Smart Systems: Innovations in Computing Arun K. Somani,Ankit Mundra,Robin Doss,Subhajit Bhattacharya,2021-09-03
This book features original papers from the 3rd International Conference on Smart IoT Systems: Innovations and Computing (SSIC 2021), presenting scientific work related to smart solution concepts. It discusses scientific works related to smart solutions concept in the context of computational collective intelligence consisted of interaction between smart devices for smart environments and interactions. Thanks to the high-quality content and the broad range of the topics covered, the book appeals to researchers pursuing advanced studies.

Nuclear Oncology H. William Strauss,Giuliano Mariani,Duccio Volterrani,Steven M. Larson,2012-11-27 This book provides the reader with a comprehensive understanding of both the basic principles and the clinical applications of nuclear oncology imaging techniques. The authors have assembled a distinguished group of leaders in the field who provide valuable insight on the subject. The book also includes major chapters on the cancer patient and the pathophysiology of abnormal tissue, the evaluation of co-existing disease, and the diagnosis and therapy of specific tumors using functional imaging studies. Each chapter is heavily illustrated to assist the reader in understanding the clinical role of nuclear oncology in cancer disease therapy and management.

All of Us in Our Own Lives Manjushree Thapa,2018-09-11 A beautiful story of strangers who shape each other's lives in fateful ways, All of Us in Our Own Lives delves deeply into the lives of women and men in Nepal and into the world of international aid. Ava Berriden, a Canadian lawyer, quits her corporate job in Toronto to move to Nepal, from where she was adopted as a baby. There she struggles to adapt to her new career in international aid and forge a connection with the country of her birth. Ava's work brings her into contact with Indira Sharma, who has ambitions of becoming the first Nepali woman director of a NGO; Sapana Karki, a bright young teenager living a small village; and Gyanu, Sapana's brother, who has returned home from Dubai to settle his sister's future after their father's death. Their journeys collide in unexpected ways. All of Us in Our Own Lives is a stunning, keenly observant novel about human interconnectedness, about privilege, and about the ethics of international aid (the earnestness and idealism and yet its cynical, moneyed nature).

Advanced Nanostructured Materials for Environmental Remediation Mu. Naushad,Saravanan Rajendran,Francisco

Gracia,2019-03-14 This book provides a wide-range exploration on the ongoing research and developmental events in environmental nanotechnology. Emerging nanomaterials and its technology have been known to offer unique advantages and are continually showing promising potential attracting continuous global attention. This work thus discusses experimental studies of various nanomaterials along with their design and applications and with specific attention to chemical reactions and their challenges for catalytic systems. It will make a noteworthy appeal to scientists and researchers working in the field of nanotechnology for environmental sciences.

Nanomaterials for Sustainable Energy and Environmental Remediation Mu. Naushad,R. Saravanan,Raju Kumar,2020-03-14 Nanostructured materials, especially, 1D, 2D and 3D nanostructures, and their engineered architectures are being increasingly used due to their potential to achieve sustainable development in energy and environmental sectors, providing a solution to a range of global challenges. A huge amount of research has been devoted in the recent past on the fine-tuning of nano-architectures to accomplish innovations in energy storage and conversions, i.e., batteries, supercapacitors, fuel cells, solar cells, and electrochromic devices, bifunctional catalysts for ORR and OER, gas to fuels, liquid to fuels, and photocatalysts, corrosion, electrochemical sensors, and pollution and contaminants removal. **Nanomaterials for Sustainable Energy and Environmental Remediation** describes the fundamental aspects of a diverse range of nanomaterials for the sustainable development in energy and environmental remediation in a comprehensive manner. Experimental studies of various nanomaterials will be discussed along with their design and applications, with specific attention to various chemical reactions involving and their challenges for catalysis, energy storage and conversion systems, and removal of pollutants are addressed. This book will also emphasise the challenges with past developments and direction for further research, details pertaining to the current ground - breaking technology and future perspective with multidisciplinary approach on energy, nanobiotechnology and environmental science Summarizes the latest advances in how nanotechnology is being used in energy and environmental science Outlines the major challenges to using nanomaterials for creating new products and devices in the sustainable energy and environmental sectors Helps materials scientists and engineers make selection and design decisions regarding which nanomaterial to use when creating new products and devices for energy and environmental applications

Ash from Coal and Biomass Combustion Ashok K. Singh,Reginald Ebhin Masto,Bodhisatwa Hazra,Joan Esterle,Pradeep K. Singh,2020-09-12 This is a concise book with comprehensive information on coal and biomass ash generated from their combustion in thermal power plants. It presents detailed studies on ash generated from contrasting coal and biomass feedstocks, and provides a comparative evaluation of these different ashes in terms of their origin, properties, environmental hazards. Potential utilizations with specific advantages and disadvantages of the respective ashes are elaborated in detail, including some innovative means of ash utilization for value addition purposes. By addressing both

the theory and commercial exploitation of these products, this book will be helpful for industrialists, academicians and researchers alike.

Carotenoids Agnieszka Kaczor, Malgorzata Baranska, 2016-01-19 Carotenoids are an essential component of the human diet. Bioactive by nature, they are rich in antioxidants, promote vitamin A activity and lower the development of chronic illnesses. As such they are an area of growing interest to researchers and scientists who are working to design, develop and launch new functional food products, dietary supplements and other nutritional solutions. *Carotenoids: Nutrition, Analysis and Technology* is an up-to-date overview of the key areas of carotenoids in nutrition, therapy and technology. In the first section, the authors present a functional food perspective, outlining the therapeutic applications of the bioactive pigments. The second part is dedicated to the spectroscopic analysis of carotenoids, providing in-depth scientific methods and real research findings. In the final section, various technological applications of carotenoids are considered, including biotechnology and future prospects. Written by international experts in the field, this comprehensive book will be of interest to food scientists and researchers, nutritionists and health food companies. It will be of particular use to anyone involved in the spectroscopic analysis of carotenoids and other related bioactives.

Food Analysis by HPLC Leo M.L. Nollet, Fidel Toldra, 2012-11-16 For food scientists, high-performance liquid chromatography (HPLC) is a powerful tool for product composition testing and assuring product quality. Since the last edition of this volume was published, great strides have been made in HPLC analysis techniques-with particular attention given to miniaturization, automatization, and green chemistry. Unleashing Nepal Sujeev Shakya, 2013-09-04 *Unleashing Nepal* tells the story of Nepal's changing economy, from the time of unification to a remittance economy driven by the labour of Nepal's diaspora. Acclaimed columnist and business leader Sujeev Shakya examines not only the squandered opportunities of the past but also what Nepali citizens need to do to escape from a feudal history of dependence and powerlessness. Here is a Nepal that could be an Asian Tiger. Here are resourceful village communities who manage their own electricity, aspirational Nepali youth, energetic migrant workers, and driven foreign-aid workers, who can make this dream a reality. Compelling and eminently readable, this updated and enriched version brings the country alive with its acute business understanding, humour and local colour.

The Constituents of Medicinal Plants Andrew Pengelly, 2020-08-04 Pengelly's user friendly text will encourage educators in medical science to consider using this material in the complementary medicine/nutraceuticals areas May I congratulate Andrew Pengelly for writing this text as it is going to be very popular with undergraduate students as well as more experienced readers.' D. Green, London Metropolitan University, UK This unique book explains in simple terms the commonly occurring chemical constituents of medicinal plants. The major classes of plant constituents such as phenols, terpenes and polysaccharides, are described both in terms of their chemical structures and their pharmacological activities.

Identifying specific chemical compounds provides insights into traditional and clinical use of these herbs, as well as potential for adverse reactions. Features include: * Over 100 diagrams of chemical structures * References to original research studies and clinical trials * References to plants commonly used throughout Europe, North America and Australasia. Written by an experienced herbal practitioner, *The Constituents of Medicinal Plants* seriously challenges any suggestion that herbal medicine remains untested and unproven, including as it does hundreds of references to original research studies and trials. Designed as an undergraduate text, the first edition of this book became an essential desktop reference for health practitioners, lecturers, researchers, producers and anyone with an interest in how medicinal herbs work. This edition has been extensively revised to incorporate up-to-date research and additional sections, including an expanded introduction to plant molecular structures, and is destined to become a classic in the literature of herbal medicine.

Food Carotenoids Delia B. Rodriguez-Amaya, 2015-11-09 Carotenoids were first studied as natural pigments, then as precursors of vitamin A, and then as bioactive compounds against chronic diseases. These compounds have been and continue to be the subject of intense research worldwide, now with an expanded scope. *Food Carotenoids: Chemistry, Biology and Technology* gathers all the important information about these major compounds which impact both food quality and human health. It integrates in one volume various aspects of food carotenoids, such as: Structures and physicochemical properties Biosynthetic pathways and metabolism Analysis and composition of foods Stability and reactions during processing Commercial production as food colorants and precursors of aroma compounds Bioavailability and health benefits Having worked with carotenoids in various aspects for 44 years, Delia Rodriguez-Amaya is uniquely placed to pass on her wealth of knowledge in this field. This book will serve as solid background information for professionals in Food Science, Food Technology, Nutrition, Agriculture, Biology, Chemistry and Medical Sciences, whether in the academe, industry, governmental and non-governmental agencies.

OphthoBook, 2009-07-20 OphthoBook is the printed version of the amazing OphthoBook.com online book and video series. The combination of this text, along with the online video lectures, creates the most informative and easy-to-understand ophthalmology review ever written. It is geared toward medical students, optometry students, and non-ophthalmologists who want to learn more about the eye without getting bogged down with mindless detail. The book is broken down into ten chapters: 1. Eye History 2. Anatomy 3. Glaucoma 4. Retina 5. Infection 6. Neuroophthalmology 7. Pediatric Ophthalmology 8. Trauma 9. Optics 10. Lens and Cataract Each chapter also includes pimp questions you might be asked in a clinic. Also, an entire chapter of ophthalmology board-review questions, flashcards, and eye abbreviations. Perhaps most useful, each chapter corresponds to the 20-minute video lectures viewable at OphthoBook.com. And lots of fun cartoons!

Sustainable Agriculture Reviews 35 Grégorio Crini, Eric Lichtfouse, 2019-06-04 This book reviews recent research and

applications of chitin and chitosan, as natural alternatives of fossil fuel products, in green chemistry, energy, biotechnology, bioprinting, medicine, water treatment, agriculture and food science. Chitin and chitosan products are polysaccharides derived from food waste of crustaceans and fungi, and thus are cheap, abundant, sustainable, non-toxic, recyclable and biocompatible.

Reproductive and Developmental Toxicology Ramesh C. Gupta, 2011-04-04 Reproductive toxicology is a complex subject dealing with three components—parent, placenta, and fetus—and the continuous changes that occur in each. Reproductive and Developmental Toxicology is a comprehensive and authoritative resource providing the latest literature enriched with relevant references describing every aspect of this area of science. It addresses a broad range of topics including nanoparticles and radiation, gases and solvents, smoking, alcohol and drugs of abuse, food additives, nutraceuticals and pharmaceuticals, and metals, among others. With a special focus on placental toxicity, this book is the only available reference to connect the three key risk stages, and is the only resource to include reproductive and developmental toxicity in domestic animals, fish, and wildlife. Provides a complete, integrated source of information on the key risk stages during reproduction and development Includes coverage of emerging science such as stem cell application, toxicoproteomics, metabolomics, phthalates, infertility, teratogenicity, endocrine disruption, surveillance and regulatory considerations, and risk assessment Offers diverse and unique in vitro and in vivo toxicity models for reproductive and developmental toxicity testing in a user-friendly format that assists in comparative analysis

Chest Sonography Gebhard Mathis, 2022-11-15 This book, widely regarded as the standard work in the field, presents the state of the art in chest sonography, enhanced by a wealth of excellent illustrations. It provides the reader with concise, easy-to-assimilate information on all aspects of the use of the modality, including indications, investigative techniques, diagnostic decision making, and imaging artifacts and pitfalls. Chapters offer numerous tips and tricks and highlight potential diagnostic error sources to aid in daily clinical practice. This sixth edition has been extensively revised to consider the latest techniques, study results, and meta-analyses and includes essential additional illustrative material. Chapter revisions include detailed guidance on contrast-enhanced ultrasound (CEUS) and the use of thoracic point-of-care ultrasound (PoCUS) in emergency patients. As the technique's value and use continue to grow, readers will find Chest Sonography a valuable up-to-date resource and guide.

Fruit Preservation Amauri Rosenthal, Rosires Deliza, Jorge Welte-Chanes, Gustavo V. Barbosa-Cánovas, 2018-11-05 Fruits and fruit based products are, in most cases, associated with very good sensory characteristics, health, well-being, perishability, relatively easy to mix with food products of diverse origin, amenable to be processed by conventional and novel technologies. Given the multiplicity of aspects whenever fruit preservation is considered, the editors took the challenge of covering in a thorough, comprehensive manner most aspects dealing with this topic. To accomplish these goals, the editors

invited well known colleagues with expertise in specific disciplines associated with fruit preservation to contribute chapters to this book. Eighteen chapters were assembled in a sequence that would facilitate, like building blocks, to have at the same time, a birds-eye view and an in-depth coverage of traditional and novel technologies to preserve fruits. Even though processing took center stage in this book, ample space was dedicated to other relevant and timely topics on fruit preservation such as safety, consumer perception, sensory and health aspects. **FEATURES:** Traditional and Novel Technologies to Process Fruits Microwaves Ohmic Heating UV-C light Irradiation High Pressure Pulsed Electric Fields Ultrasound Vacuum Impregnation Membranes Ozone Hurdle Technology Topics Associated with Fruit Preservation Safety Nutrition and Health Consumer Perception Sensory Minimal Processing Packaging Unit Operations for Fruit Processing Cooling and Freezing Dehydration Frying

Vagabond Mary A.J.,2021-09-09 All hope abandon ye who read this book. After ruling Hell for more than two centuries, Cecilia escapes the confines of the underworld seeking safety and a normal life. She finds anything but when she lands in Cornelia High School, only to discover a hunt for an ancient artifact, a charming demon, and an enigmatic human. When her whole new life is threatened, she will discover how far she'll go to save the person she loves and keep her freedom. Loyalties, blood, and faith will be tested. At the end of it all, Cecilia must make a choice: preserve her humanity or unleash the merciless Princess of Hell.

Battles of the New Republic Prashant Jha,2014-01-12 Battles of the New Republic: A Contemporary History of Nepal is a story of Nepal's transformation from war to peace, monarchy to republic, a Hindu kingdom to a secular state, and a unitary to a potentially federal state. Part-reportage, part-history, part-analysis, part-memoir, and part-biography of the key characters, the book breaks new ground in political writing from the region. With access to the most powerful leaders in the country as well as diplomats, it gives an unprecedented glimpse into Kathmandu's high politics. But this is coupled with ground-level reportage on the lives of ordinary citizens of the hills and the plains, striving for a democratic, just and equitable society. It tracks the hard grind of political negotiations at the heart of the instability in Nepal. It traces the rise of a popular rebellion, its integration into the mainstream, and its steady decline. It investigates Nepal's status as a partly-sovereign country, and reveals India's overwhelming role. It examines the angst of having to prove one's loyalties to one's own country, and exposes the Hindu hill upper-caste dominated power structures. Battles of the New Republic is a story of the deepening of democracy, of the death of a dream, and of that fundamental political dilemma - who exercises power, to what end, and for whose benefit.

Rice Production Worldwide Bhagirath S. Chauhan,Khawar Jabran,Gulshan Mahajan,2017-02-16 This book addresses aspects of rice production in rice-growing areas of the world including origin, history, role in global food security, cropping systems, management practices, production systems, cultivars, as well as fertilizer and pest management. As one of the three

most important grain crops that helps to fulfill food needs all across the globe, rice plays a key role in the current and future food security of the world. Currently, no book covers all aspects of rice production in the rice-growing areas of world. This book fills that gap by highlighting the diverse production and management practices as well as the various rice genotypes in the salient, rice-producing areas in Asia, Europe, Africa, the Americas, and Australia. Further, this text highlights harvesting, threshing, processing, yields and rice products and future research needs. Supplemented with illustrations and tables, this text is essential for students taking courses in agronomy and production systems as well as for agricultural advisers, county agents, extension specialists, and professionals throughout the industry.
